

Cross-Media Demo

A sample document for nested concealment.

Recovered successfully?

This PDF is the original payload of template 02.

Its encrypted parts are distributed across image2 and image3.

The image2 carrier is then concealed inside image1.

Password fragments are stored in image1 and song.mp3.

Recover image2 first, then use both inner carriers and the recipient private key to recover this document.

Demo verification code: SIENG2-CROSS-MEDIA-2026
